

解决 -bash: cd: bin/: Permission denied问题

```
[ecs-user@patrick tomcat]$ cd apache-tomcat-10.0.27/  
[ecs-user@patrick apache-tomcat-10.0.27]$ ls  
bin          CONTRIBUTING.md  logs          RELEASE-NOTES  webapps  
BUILDING.txt lib            NOTICE       RUNNING.txt    work  
conf         LICENSE        README.md     temp  
[ecs-user@patrick apache-tomcat-10.0.27]$ cd bin  
-bash: cd: bin: Permission denied
```

出现这个问题的原因是因为没有权限，修改一下目录的权限即可

命令：sudo [chmod](#) 777 /usr/dev/tomcat-8080/bin/

修改该目录权限为others，group，user都有读和可执行权限
