

远程仓库从github换成gitee

git命令中的origin是远程仓库的意思。

1、输入以下命令，删除关联的origin的远程库。(因为git默认只能关联一个远程库，所以想要关联到gitee上，先要把已经关联的github取消关联。)

```
$ git remote rm origin
```

```
patrick@LAPTOP-9FBULIF8 MINGW64 /d/IT/git/repository/note (main)
$ git remote rm origin
```

2、输入以下命令，重新关联到自己的仓库

```
$ git remote add origin 项目仓库地址 (https://gitee.com/xxxxxx.git)
```

```
patrick@LAPTOP-9FBULIF8 MINGW64 /d/IT/git/repository/note (main)
$ git remote add origin https://gitee.com/patrickXu/note.git
```

3、输入以下命令，重新推送即可。注意命令中的是main，不是master. 因为分支名是main而不是master。

```
git push origin main
```

```
patrick@LAPTOP-9FBULIF8 MINGW64 /d/IT/git/repository/note (main)
$ git push origin main
